

Upgrade/Replace legacy Dantel Status Monitor Systems

“Status Monitor”

The **VisionMaster** local alarm-monitoring solution directly replaces legacy Dantel “Status Monitors” systems with a Windows (2000/NT/XP) based technology. Install, Turn-up and Test in less than an hour. State-of-the-art technology makes VisionMaster an essential component for real-time awareness of critical CO events.

“VisionMaster Local”

Benefits:

- Direct replacement solution
- Leverages existing interfaces
- Improves technology
- Minimizes overall labor costs
- Improve CO Quality of Service
- Minimize administration cost
- Leverage existing 460 ACS configurations

Key Features and Capabilities:

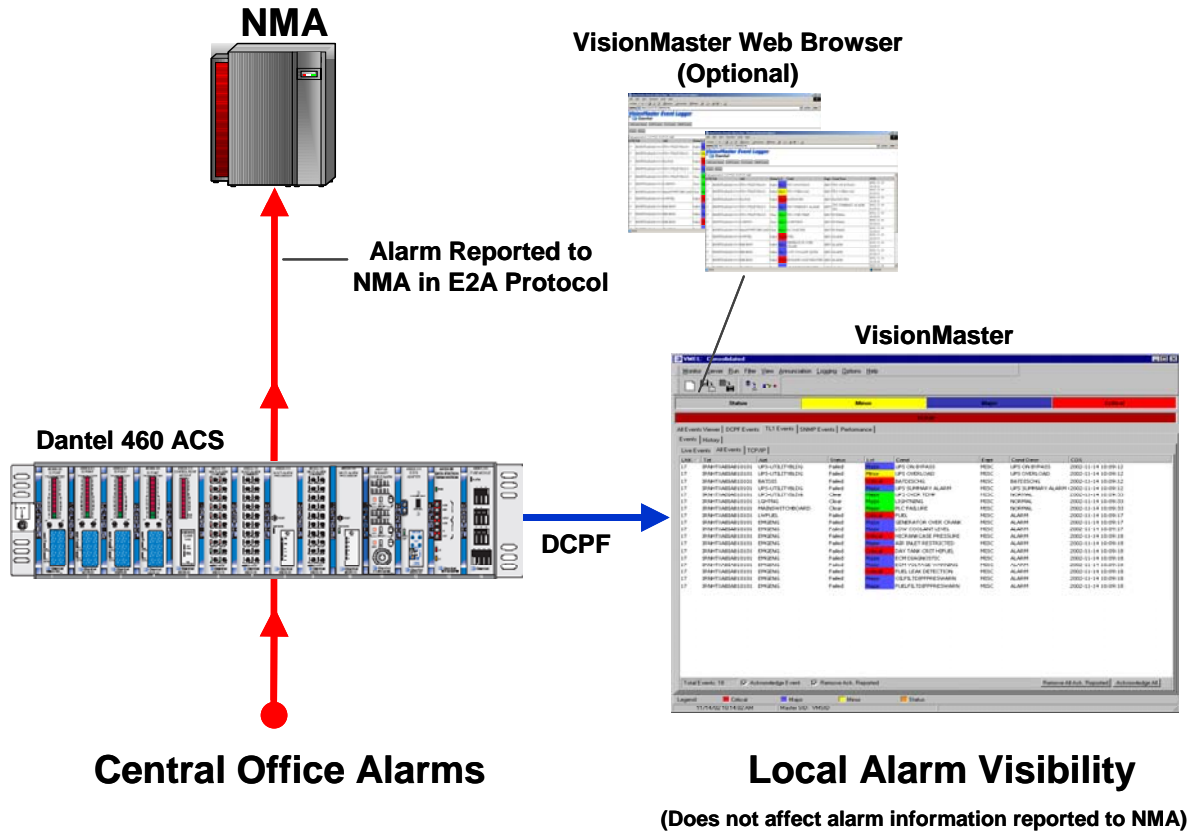

- Windows based
- DCPF, SNMP, TL1 and ASCII protocols
- Multi serial and TCP/IP event monitoring
- Web Browser Access
- Multiple sorted views
- History
- Email paging and notification
