

Upgrade your legacy Dantel Smart Block alarm devices

Dantel Smart Block

Directly replace existing Dantel legacy Smart Blocks (Alarm and Control Block) with **PointMaster Eagles**. Replacement options include the Eagle Smart Adapter Kit (ESAK) or a complete “forklift”. The ESAK (An Eagle with an adapter kit) allows you to leverage existing alarm wiring, eliminating all associated costs. With ESAK replacement, turn-up and testing takes less than an hour. “Forklift” replacement is estimated at 1 to 2 days.

Actual ESAK Installation

Pointmaster Eagle is designed to function in legacy as well as newer alarm network infrastructures. The Eagle supports serial or TCP/IP communications for reporting to an existing 460 ACS system or directly to a host system, simultaneous if desired.

Benefits:

- Improve technology
- Leverage existing alarm wiring
- Minimize labor costs
- Decrease Maintenance costs
- Minimize administration cost
- No configuration or database changes

Key Features and Capabilities:

- TBOS, TABS, DCM, DCPF, SNMP, TL1 protocols
- Integrated 10/100 BaseT TCP/IP Ethernet
- Web Browser and FTP (upgrades)
- Multi serial and/or IP event reporting
- Database and System Configuration Utility
- NEBS and CE Mark certified
